SELECTED PROJECTS

Lifebuoys
Trygg Hansa / Lowe Brindfors
April 2015 - May 2015

TryggHansa wants to show of some of all the lifebuoys they have put up alongside the Swedish coastline. My part in the project was to develop an interactive map using the Google Maps JavaScript API. Other technologies used were CSS3, HTML5, SASS and JavaScript.

Gravidresan
Libero / SCA / Creuna
June 2014 - August 2014

Gravidresan is a utility app for iOS that lets pregnant women (and men) take pictures of the belly during the pregnancy and export all the pictures as a movie of a growing belly.

WHERE THE ** IS THE BUS?**
Västtrafik / F&B
April 2014 - May 2014

People love to complain about public transportation, just like bad weather or taxes. Sometimes there is some truth to the criticism, sometimes it's unfair. To show that public transportation provider Västtrafik does everything in its power to keep people informed even when things go wrong, they decided to address a common question when traffic is late: "Where the #@!* is the bus?". The solution was a tool suitably named "Where the #@!* is the bus?". It's an app that show where the bus is when it's not on time.

Gravidboken
Libero /SCA /Creuna
October 2013 - February 2014

Calculate your due date and follow the pregnancy week by week in this pregnancy information app. From the overwhelming positive pregnancy test to breastfeeding, sleep deprivation and all that takes over when the baby is here and the toddlers time begins. Find out why different tests are made, how a delivery can take place and get answers to other important questions that come up.

EDUCATION

IT-University of Göteborg
2006 - 2007

Mobile Services, Master*

IT-University of Göteborg
2003 - 2006

*S*oftware Engineering and Management, Bachelor

Frölunda Gymnasium
1999 - 2002

Naturvetenskapsprogrammet

* Aborted after accepting job offer

EXPERTISE

- iOS
- Android
- Windows Phone
- High Performance Websites

- Swift
- Objective-C
- Java
- Microsoft .NET
- Javascript
