SELECTED PROJECTS

Husqvarna.com
Husqvarna / Stendahls
2020 - Present
● Tech Lead in the development team that is building the next generation of the husqvarna.com website on the Sitecore platform. The site exists on over 100 markets and and has thousands of daily active users.
Sitecore // .NET // GraphQL // React and Server Side Rendering

Göteborg Energi Customer Portal
Göteborg Energi / Stendahls
2019/2020
● Stendahls was the lead agency of the user experience for all customer facing interfaces of Göteborg Energi. The main project was developing the front end of the customer portal. We delivered a modern front-end library based on React.
React // Storybook

WHERE THE **** IS THE BUS?
Västtrafik / F&B
2014
● People love to complain about public transportation, just like bad weather or taxes. Sometimes there is some truth to the criticism, sometimes it's unfair. To show that public transportation provider Västtrafik does everything in its power to keep people informed even when things go wrong, they decided to address a common question when traffic is late: "Where the #@!" is the bus?". The solution was a tool suitably named "Where the #@!" is the bus?". It's an app that show where the bus is when it's not on time.
Objective-C

EDUCATION

IT-University of Göteborg
2003 - 2006
● Software Engineering and Management, Bachelor

Frölunda Gymnasium
1999 - 2002
● Naturvetenskapsprogrammet
